Before making any financial decisions, please thoroughly research and consider your own situation. Compliance with your local laws and regulations is essential. Remember, never invest more than you are prepared to lose, and always make decisions based on your comfort and capacity

AURUM IS A DECENTRALIZED FINTECH COMPANY, DEDICATED TO THE DEVELOPMENT OF INNOVATIVE CRYPTO PRODUCTS AND AI-POWERED ALGORITHMS THAT REDEFINE HOW USERS MANAGE AND GROW THEIR DIGITAL ASSETS.

We offer a secure and efficient ecosystem where investments, payments, and trading come together seamlessly, empowering both individuals and businesses to achieve their financial goals.

AURUM

8 **DATA ANALYSTS**

- Development of machine learning algorithms for analyzing and processing historical trading data from global markets.
- Creation of the core AI model for the AI-Trader EX algorithm.

12 **YEARS - AVERAGE TEAM EXPERIENCE**

Our team of developers and analysts has an average of 12 years of professional experience. We leverage our extensive expertise to create innovative products within our ecosystem.

At Aurum, we are a team of 35+ top-tier professionals with extensive experience in finance, blockchain, and AI-driven trading, bringing expertise from leading global companies, including Binance, Morgan Stanley, OKX, Wise, Bitget, and IBM Blockchain.

We bridge institutional finance and blockchain innovation, delivering AI-powered trading, risk management, and scalable investment solutions.

BINANCE   Morgan Stanley   **IBM**   **Bitget**   **OKX**   **WISE**

10 **SOFTWARE DEVELOPERS**

- Development and maintenance of the ecosystem.
- Integration of algorithms and trading strategies into the company's products.
- Identification and correction of vulnerabilities.

7 **FINANCIAL ANALYSTS**

- Creation and manual testing of new trading strategies.
- Development of methodologies for news analysis.
- Planning long-term positions and scaling the company.

AURUM

DREI MENZA

Co-Founder & Director of Trading operations

> "If you want to beat the market, remove fear, greed, and hesitation—automate, refine, and execute. At Aurum, that's our vision, and we are making it a reality."

Drei Menza, Co-Founder of Aurum, leads the company's trading operations. A seasoned trader with extensive expertise in algorithmic strategies and financial market analysis, he is responsible for designing and optimizing the advanced algorithms driving Aurum's trading bots.

Under his leadership, Aurum's trading systems deliver precision, efficiency, and consistent results. His strategic approach to data-driven market strategies and risk management ensures security and sustainable growth for all contributors, establishing Aurum as a leader in trading innovation.

AURUM

BRYAN BENSON

Director of Strategy &
CEO of Aurum Exchange

> "Binance became a fintech unicorn in just one year. At Aurum, we take a more conservative approach, setting this as our goal for the next three years."

A web3 pioneer with 27 years of experience, Bryan has led initiatives in crypto, blockchain, and DeFi across global markets.

At Aurum, he drives strategic growth and access to digital assets, shaping innovative, scalable solutions. Bryan's previous leadership roles include Director of LATAM for Binance, where he expanded blockchain adoption in emerging markets.

He focuses on bridging traditional and decentralized finance, creating new opportunities for investors.

AHMAD ZEN

Co-Founder & Marketing Director

> "My goal at Aurum is to build a leading community of hundreds of thousands of people in the next three years and provide them with financial tools for true financial freedom."

Ahmad Zen, Marketing Director at Aurum, has over 15 years of experience in network marketing and cryptocurrency. Known for his strategic acumen, Ahmad has driven impactful marketing campaigns across fintech and blockchain sectors, significantly boosting brand visibility and customer acquisition.

At Aurum, he leverages his deep knowledge of digital marketing and emerging trends to develop innovative strategies that foster growth and engagement.

AL RIZQI

Director of Product Development

> "Every product should solve a problem, but the best products anticipate future needs. At Aurum, we are building solutions for the financial world of tomorrow."

With over 6 years of experience in business development and project management, Al Rizki is known for creating innovative and forward-thinking solutions, especially in the fintech space. At Aurum, he plays a key role in shaping product strategy, ensuring that each solution delivers high performance and meets the changing needs of users, contributing to the company's growth and innovation.

DR BRYAN

Chief Blockchain Officer

> "Innovation in blockchain isn't about replacing traditional finance, but about evolving it to meet modern demands. At Aurum, we are pioneering secure and scalable blockchain solutions to make decentralized finance accessible to everyone."

With over 25 years of experience in the blockchain industry, Dr Bryan is a certified expert in blockchain, finance, and digital marketing. As the Principal of Chain Network Academy, he has trained countless professionals and entrepreneurs. At Aurum, he leads the development and implementation of blockchain solutions, ensuring seamless integration and innovation across the ecosystem.

$13 000 000+

IN TRADING VOLUME

Our trading ecosystem, powered by AI algorithms and cutting-edge financial tools, has reached an impressive $13 million in total trading turnover, reflecting both high activity and user success.

4

INNOVATIVE PRODUCTS LAUNCHED

We've introduced **AI-Trader EX Bot, Zeus AI Trading Bot, Aurum Flash and Aurum Neo-Bank** —all designed to provide users with opportunities for sustainable earnings, secure investments, and seamless crypto payments.

$6 000 000+

IN AI-POWERED ARBITRAGE TRADES

INTRODUCTION TO AI-POWERED

TRADING ALGORITHMS

WHAT ARE AI-POWERED TRADING ALGORITHMS?

AI-powered trading algorithms are advanced tools that interact with financial markets in real-time, automating complex trading operations. They rely on sophisticated infrastructure, analyzing millions of parameters per second to identify optimal opportunities. This automation combines years of trading expertise and ensures consistent, reliable performance.

SEAMLESS AUTOMATION

Trading is fully automated, allowing the system to continuously monitor and interact with the market—24/7, without manual input.

REAL-TIME MARKET RESPONSE

Algorithms respond instantly to price movements, news events, and changing conditions, making data-driven decisions within milliseconds

UNMATCHED DATA ANALYSIS

AI trading systems process and evaluate vast amounts of information, including market trends, liquidity, and sentiment, ensuring more accurate trading outcomes.

PROVEN AND RELIABLE

Backed by years of real-world testing, these systems have consistently demonstrated security, reliability, and adaptability across various market conditions.

ENHANCED EFFICIENCY

Unlike traders, AI algorithms operate without breaks, never missing profitable opportunities due to human limitations.

BUILT-IN RISK MANAGEMENT

The algorithms follow predefined risk protocols, protecting capital by limiting exposure and preventing emotional or irrational decisions.

↓ **WHY IS MANUAL TRADING CHALLENGING?** ↓

CHALLENGING?

1. MARKETS OPERATE 24/7

Problem: Financial markets function without pauses, and critical events can occur at any time. Human traders cannot constantly monitor market conditions, which may result in missed opportunities or delayed responses.

Solution: AI-powered systems operate continuously, analyzing and executing trades around the clock, ensuring that opportunities are captured in real-time.

2. RAPID MARKET MOVEMENTS

Problem: Market conditions can change in a matter of seconds. Human analysis and decision-making processes often cannot keep up with such rapid shifts, leading to missed or poorly timed trades.

Solution: AI systems react within milliseconds, processing market changes instantly and executing trades with unmatched speed and precision.

3. DATA OVERLOAD

Problem: Effective trading requires the ability to process vast amounts of data, including price movements, market trends, news, and economic indicators. For human traders, handling this level of complexity often leads to information overload and suboptimal decision-making.

Solution: AI systems are designed to analyze millions of data points simultaneously, providing comprehensive insights that inform better trading decisions.

4. EMOTIONAL DECISION-MAKING

Problem: Trading decisions can be influenced by emotions such as fear, greed, and stress, particularly during market volatility. Emotional reactions can result in irrational trades and increased risk exposure.

Solution: AI-powered systems are free from emotional influence, consistently applying pre-set strategies based on objective data and risk parameters.

### 5. SCALABILITY LIMITS PROBLEM

Problem: Human traders struggle to manage multiple strategies and assets simultaneously, and adapting to changing markets manually is challenging.

Solution: Aurum's AI systems, continuously enhanced by a team of 35+ experts, adapt to market changes, enabling large-scale, multi-market operations with optimized risk management.

AURUM AI-TRADER EX BOT

The Aurum AI-Trader EX Bot is an advanced, fully autonomous trading system designed to maximize profitability in the cryptocurrency market. Leveraging AI to analyze real-time data, it operates 24/7 to make strategic, low-risk spot trades on your behalf.

Automated Performance: Once you activate the bot, it manages trades autonomously, aiming to maximize potential gains while minimizing risks.

Multi-Pair Trading: The bot trades across multiple pairs, optimizing strategies for maximum profit.

Proven Returns: With over 1.5 years of consistent performance, the bot demonstrates an average monthly return of 18.5%.

Advanced Risk Management: The bot applies strict risk protocols, adapting to market changes to ensure secure trading.

- Track every trade in real time, from entry to exit.
- Monitor performance metrics with full trade history and results.
- Live tracking of how the bot reacts to market conditions and executes profitable trades.

↓ **WHY CHOOSE AURUM?** ↓

WHY CHOOSE AURUM?

AURUM

1. COMPREHENSIVE RANGE OF TRADING PRODUCTS

Our ecosystem includes AI-powered trading bots, staking, NFT licenses, crypto cards, and a decentralized exchange, providing diverse opportunities for asset growth and earnings. This product variety allows users to select strategies that fit their goals and risk preferences.

2. CLEAR AND COMPETITIVE PROFITABILITY MODEL

Aurum offers a transparent earnings structure, with returns that outperform traditional market benchmarks. Our proven model is designed to maximize long-term profitability through both automated and flexible financial tools.

3. FLEXIBILITY IN INVESTMENT OPTIONS

We provide users with both locked and non-locked investment products, giving them full control over their funds. Whether seeking immediate liquidity or long-term staking opportunities, Aurum ensures tailored solutions to meet diverse financial needs.

4. ADVANCED TECHNOLOGY AND AUTOMATION

Our AI-powered algorithms optimize trading operations, providing data-driven strategies and around-the-clock market monitoring. This automation minimizes risks and maximizes efficiency, making complex trading accessible to all.

5. EXPERT-LED INNOVATION AND RISK MANAGEMENT

Aurum's products are developed and continuously optimized by a team of 35+ industry professionals. These experts ensure that our solutions remain reliable, secure, and adaptive to market changes. In addition, robust risk management protocols protect investments at every stage.

6. INTEGRATED FINANCIAL ECOSYSTEM

Aurum brings together multiple interconnected services, including payments, trading, and investments, within a single, secure platform. This seamless integration enables users to grow and manage wealth efficiently without the need for external tools.
